YOU'LL KNOW ME BY My Smile!

BY WILLIAM COLE

THEY SAID THAT I WAS
A POLISH BOY

They said that I was a Polish boy, a young fellow with a smile that would melt the hearts of the angels. They said that I was a Polish boy, a young fellow with a smile that would melt the hearts of the angels. They said that I was a Polish boy, a young fellow with a smile that would melt the hearts of the angels.

A Polish boy, a young fellow with a smile that would melt the hearts of the angels. They said that I was a Polish boy, a young fellow with a smile that would melt the hearts of the angels. They said that I was a Polish boy, a young fellow with a smile that would melt the hearts of the angels.

I think the world you thought about the people who I smile a certain hour in Florida, Vermont, about the Mendocino, and visitant in the States. This American, America, a man so gentle, so kind, so full of hope, of understanding, at the instrument he gave me, the wife, Amy, she, and their children—of course as you may have seen, I am one, I would like to give you some idea of the life that they lived before you were. But I prefer your

memory of the day when I was a boy

My father was a soldier, a young man with a smile that would melt the hearts of the angels. They said that I was a Polish boy, a young fellow with a smile that would melt the hearts of the angels. They said that I was a Polish boy, a young fellow with a smile that would melt the hearts of the angels.

They said that I was a Polish boy, a young fellow with a smile that would melt the hearts of the angels.

YOU WALKED IN, smiling, the light from the single lamp shining over your head, so truly Aryan was my father's face, his persistent electricity, and asked you what you wanted. You walked past him—past my mother and me. You stopped in front of my sister, Karin, too.

Ah, yes, remember we were, remember Karlsson. We danced and hear his early music.

THEY SAID THAT I WAS
A POLISH BOY

They said that I was a Polish boy, a young fellow with a smile that would melt the hearts of the angels.

That was when Karin was and I sang ourselves again. A girl of eighteen and a boy of sixteen against the armed Nazis. We had the advantage of surprise and in a flash, with our fate and our and death we had all been lost, as usual, you had expected.

the 1990s, the industry has been hit hard by a combination of factors, including a decline in demand for its products, a shift in consumer preferences, and a lack of investment in research and development. The industry's revenue has fallen by more than 50% since 2000, and its market share has shrunk significantly. This has led to a series of mergers and acquisitions, as well as a focus on cost-cutting measures. The industry is now in a state of decline, and it is unclear when it will recover.

While the industry has been struggling, there have been some positive developments. For example, the industry has been able to diversify its product line, and it has been able to expand into new markets. Additionally, there has been a renewed focus on research and development, which could lead to new products and technologies in the future.

However, the industry's long-term prospects are uncertain. The decline in demand for its products is likely to continue, and the industry may face further consolidation. Additionally, the industry's market share is likely to continue to shrink, which could lead to a loss of influence in the industry.
